WELCOME TO OUR COMPANY

Sri Venkateshwara Pressings stands out as a leading sheet metal stamping components manufacturer in Chennai, backed by over 25 years of expertise in power press and hydraulic press maintenance and supervision.

We are the professionals working for the quality of the jobs and also in enduring relationship with the customers. Our professionals always focus on customer satisfaction, high quality, Integrity and commitment in right time delivery.

VISION

To be the most desired partner in the market place of pressed components. Attain a winning and long term network with our suppliers & customers.

MISSION

To be in the best position to support and add value to our customers by providing superior products in terms of quality, cost and time.

VALUES

- Integrity in all our actions
- Quality in what we do
- Passion at work
- Respect all

BENEFITS TO CLIENTS

- Single Point of contact
- Ownership with responsibility
- Efficient and Quality services
- Transparency in operation
- On time delivery
- Good relationship with customers

Benefits of Using MS Filters in Aluminum Diecasting

- **Avoid Extra Operations and Costs:** Using MS filters during the pouring of molten aluminum metal prevents the formation of raisers, eliminating the need for additional cutting operations, thereby saving on machine and manpower costs.
- **Reduce Turbulence:** MS filters help to eliminate turbulence during the pouring process, ensuring a smoother flow of molten aluminum into the mold.
- **Control Pouring Timing and Flow:** These filters assist in controlling the pouring timing and the flow rate of molten aluminum, leading to improved casting quality.
- **Reusability:** MS filters are reusable, making them a cost-effective solution for aluminum diecasting processes.
- **High Heat Resistance:** MS filters can withstand temperatures up to 1450 degrees Celsius, making them suitable for high-temperature applications in diecasting.

MS Filters Can Be Used In Gravity Die Casting
